DETAILED ACTION

1. All outstanding claims objections and 35 USC 112, 2nd paragraph rejections are withdrawn in light of applicant's amendment filed on 4/17/2009.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior office action.
3. No new grounds of rejection are set forth below. Thus, the following action is properly made final.

Claim Rejections - 35 USC § 102

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
5. Claims 8-10, 38, and 56 are rejected under 35 U.S.C. 102(b) as being anticipated by Grot (US 4,433,082).

The rejection is adequately set forth in paragraph 4 of the Office Action mailed on 11/17/2008 and is incorporated here by reference.

Claim Rejections - 35 USC § 103

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claims 8, and 51-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bekiarian et al (US 2004/0167289) and Doyle et al (US 6,140,436) and as evidenced by Odian (*Principles of Polymerization*, see attached pages).

The rejection is adequately set forth in paragraph 8 of the Office Action mailed on 11/17/2008 and is incorporated here by reference.

8. Claims 9-10 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bekiarian et al (US 2004/0167289) and Doyle et al (US 6,140,436) as evidenced by Odian (*Principles of Polymerization*, see attached pages) as applied to claims 8, and 51-56 above and further in view of Grot (US 4,433,082).

The rejection is adequately set forth in paragraph 9 of the Office Action mailed on 11/17/2008 and is incorporated here by reference.

9. Claims 37, and 57- 59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bekiarian et al (US 2004/0167289) in view of Doyle et al (US 6,140,436).

The rejection is adequately set forth in paragraph 10 of the Office Action mailed on 11/17/2008 and is incorporated here by reference.

Response to Arguments

10. Applicant's arguments filed 4/17/2009 have been fully considered but they are not persuasive.

11. Applicant argues that Grot does not teach spherical polymeric particles but that the polymeric particles are in a variety of forms such as fluff, cubes, tubing, etc. Although the part of the reference pointed to by Applicant to is drawn to the form of the polymer employed in the process, Col 4, Lines 40-55 and Lines 62-67 disclose aqueous techniques for preparing the copolymer which include contacting monomer with an aqueous medium containing a free-radical initiator to obtain a slurry of polymer particles in granular form. Furthermore, it is noted that Applicant's have not provided evidence to the contrary, i.e., that the process disclosed by the reference results in polymer particles which are non spherical. It is noted that "the arguments of counsel cannot take the place of evidence in the record", *In re Schulze*, 346 F.2d 600, 602, 145 USPQ 716, 718 (CCPA 1965). It is the Examiner's position that the arguments provided by the applicant regarding the shape of the polymeric particles taught by Grot must be supported by a declaration or affidavit. As set forth in MPEP 716.02(g), "the reason for requiring evidence in a declaration or affidavit form is to obtain the assurances that any statements or representations made are correct, as provided by 35 U.S.C. 24 and 18 U.S.C. 1001".

12. Applicant argues that Bekiarian in view of Doyle and as evidenced by Odian does not disclose that the particles are spherical. However, it is noted that the Bekiarian discloses a process of emulsion polymerization to obtain the polymeric particles which as evidenced by Odian discloses the shape and size of particles produced by such a process. Odian does not limit the emulsion polymerization process to soluble monomers as alleged by Applicant, e.g. water soluble monomers such as vinyl acetate and styrene. It is noted that styrene, disclosed by Odian as part of the monomers which may be emulsion polymerized is not a water soluble

monomer. Furthermore, regarding emulsion polymerization as taught by Bekiarian and as evidenced by Odian, by Applicant's own admission on Page 9, Lines 30-35, Page 13, Lines 2-6 and Page 27 Lines 19-32, disclose that the fluoropolymer solid compositions comprising spherical fluoropolymer fine particles can be prepared from a dispersion obtain by emulsion polymerization. Furthermore, it is noted that "the arguments of counsel cannot take the place of evidence in the record", *In re Schulze*, 346 F.2d 600, 602, 145 USPQ 716, 718 (CCPA 1965). It is the Examiner's position that the arguments provided by the applicant regarding the polymeric particles taught by Bekiarian must be supported by a declaration or affidavit. As set forth in MPEP 716.02(g), "the reason for requiring evidence in a declaration or affidavit form is to obtain the assurances that any statements or representations made are correct, as provided by 35 U.S.C. 24 and 18 U.S.C. 1001".

Conclusion

13. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
